GB Barberi: Company profile

COMPANY

GB Barberi is a private company which has been operating for more than 60 years in the Aeronautics and Defence sector. The company occupies an area of 20,000 sq.m., 4,000 of which is under cover and has a team of more than 40 specialists, including engineers, technicians and support staff.

The company produces Ground Support Equipment (AGE-GSE) and special equipment to customer specifications. The whole production process is carried out indoors: design, manufacture, assembly, type approval and certification.

GB Barberi offers its customers custom-made solutions, taking care of production for both one-off examples and large series.

Continuous research and development, in collaboration with the most important aeronautical players, the armed services and civil users, ensure that GB Barberi continually updates its know-how and perfects its products.

CAPABILITIES

GB Barberi is organised for the complete production cycle, from design to "turn-key" supply. The company operates a quality system in accordance with international standards **UNI EN ISO 9001:2000, ISO 9100:2005** and Italian Ministry of Defence certification **AER-Q- 2110**.

All the parts of the manufacturing process are coordinated in one place:

- Engineering
- Machining
- Welding
- Assembly
- Final Checks

This organizations, guarantee us a complete know-how of every detail of our products.

We do not only provide standard products for most helicopters and aircrafts, but our main capability is to design customer specific system solutions.

GROUND SUPPORT EQUIPMENT

Our GSE products are constructed and continually improved by our highly qualified engineers.

User-friendliness and long lasting genuine quality are the key features of our products.

We have a diverse and extensive product line, developed by cooperating with major aircraft and helicopter industries, including the following product lines, and much more.

- Hydraulic Test Benches
- High Pressure Quick Couplings
- DC Static Converters
- Nitrogen and Oxygen Service Carts
- Pneumatic Tools
- Maintenance Platforms
- Axle Jacks & Tripod Jacks
- Weighing Kits
- Washing Rigs
- Pressurized Containers
- Fuel Transfer Pumps
- Helicopter Ground handling Wheels
- Special Service Carts

ENGINEERING

The Engineering department can develop projects with 3D modelling software such as CATIA And PRO ENGINEERING, complete the structural analysis with FEM software and manage electric system design and PLC programming. CAM manufacturing and CMM measurement, complete a digital manufacturing engineering and production process. Projects and related technical documents, including use and Maintenance manuals can be developed on customer's specifications.

AEROSPACE BRAND DISTRIBUTION

GB Barberi can support the **Aerospace - Commercial and Military, Electronic and Marine** markets for different parts and equipment supply. Exclusive distribution relationship with premier manufacturer for the Italian Market are in place and are always expanding. Our people, working synergistically with the OEM's product development, sales and marketing departments, can provide **high professional assistance** such as information on market orientation and analysis, technology trends and sales forecast reporting.

MAINTENANCE AND OVERHAUL

GB Barberi can offer its customers a regular equipment overhaul service and a zero hour overhaul service, with the delivery of the product as new. When performing this activity any needs to introduce **technical updates or variations** to comply with new legislation are checked. The company's many years of experience means that it can service both GB Barberi brand products and GSE made by other companies. The quality of the work carried out is safeguarded in the same way as when making a new product and **the works are certified and guaranteed**. After-sales service is guarantee on site or locally with portable equipment and a mobile workshop.
